Carolina Ribeiro Oliveira

Front End Engineer

Email: linaribeirooliveira@gmail.com
LinkedIn: linkedin.com/in/carolina-ribeiro-oliveira

SKILLS

JavaScript · TypeScript · SASS · React.js · React Native · Unit Testing · Storybook · Lint · Scrum · ReactQuery · Redux.js · Apollo GraphQL · Node.js · Git · Material-UI · RadixUI

EXPERIENCE

Andela, New York (Remote) - *Senior Front End Engineer*

DEC 2021 - Present

- **Standardization:** Initiated the project guideline documentation and customized lint rules, setting new development standards within the team and subsequently adopted by another team, enhancing code consistency and efficiency;
- **Test Coverage Enhancement:** Contributed to a collaborative effort using React Testing Library that successfully increased software test coverage from 14% to approximately 90%, enhancing the software's quality and reliability;
- **Application Refactoring Initiative:** Proactively refactored the application to remove unnecessary and insecure dependencies, reducing its size by 1GB and cutting build time in 50%, enhancing both app security and development efficiency;
- **Epic Champion Leadership:** Managed 3 key epics, and delivered an additional one within a quarter, demonstrating strong leadership and project management;
- **Product Development Contribution:** Actively shaped product functionality and user experience through significant contributions in product and design meetings;
- **Rebranding and Design System Implementation:** Spearheaded the application's rebranding significantly enhancing user experience and implemented the design system in a separate project, simplifying UX enhancements across other teams.

Key Technologies: TypeScript, ReactJS, NextJs, SASS, Jest, React Testing Library, React Query, Tailwind CSS, RadixUI

Steto, Juiz de Fora (Hybrid) - *Software Development Consultant*

SEP 2021 - MAR 2022

- **Consulting and Product Development Support:** Engaged as a consultant, dedicating approximately 20 hours per month to support product development efforts for the 'Steto Pacientes' and 'Steto Médicos' apps;

- **Health Tech App Development:** Achieved a complete rewrite of 'Steto Pacientes' and initiated development of 'Steto Médicos' within a 6-month period, advancing the project's progress and expanding its scope;
- **Mentorship Role:** Mentored the founding team in software development best practices using React Native and TypeScript, leading to an estimated 50% increase in their overall technical engagement and productivity;
- **Strategic Planning and UX Design:** Took an active part in business strategy meetings, created the website's flow and helped to make decisions that shaped how the apps and website were developed, improving the overall user experience.

Key Technologies: TypeScript, ReactNative, CSS, Lint

BizCapital, Rio de Janeiro (Remote) - *Development Analyst*
SEP 2020 - DEC 2021

- **Full-Stack Development:** Contributed to both front-end and back-end development of the admin website at BizCapital, working with ReactJs and SASS for front-end and NodeJS in a serverless AWS architecture for the back-end;
- **Fintech Mobile App Development:** Involved in mobile app development using React Native and TypeScript for the BizConta app. Implemented key features such as Pix, bank extracts, TED transactions, and a contact list in the app's micro frontend architecture;
- **Development Tools:** Used Apollo Client for effective GraphQL data management and Storybook for component documentation, improving the development workflow and team efficiency;
- **Learning DevOps and Deployment Skills:** Gained initial experience in DevOps by helping to configure automated deployment pipelines, contributing to the application release process.

Key Technologies: TypeScript, SASS, React.js, React Native, Storybook, Apollo GraphQL, Node.js, BitBucket, AWS S3, AWS Lambda

JazzSolutions.IT, São Paulo (Remote) - *Front End Developer*
JAN 2020 - APR 2020

- **First Remote Setting:** Worked as a front-end developer in a small, organized, remote team, focusing on developing the front-end architecture. Gained valuable experience and knowledge in this role, enhanced by the collaborative and curious nature of the team;
- **MVP Development:** Developed an MVP for an internal logistics system using ReactJS, Redux, and Material UI. Completed the project within a 4-month timeframe, showcasing growing skills in time management and application development;
- **Agile Practices:** Involved in a Scrum-based team, contributing to task divisions and workflow improvements. Gained valuable insights into agile practices and team collaboration;

- **Code Review:** Participated in code reviews to ensure functionality, established standards and architecture. Focused in maintaining the quality and reliability of code in the development process.

Key Technologies: JavaScript, ReactJs, Redux, Material-UI, Code Review

Smarti9, Juiz de Fora (On-site) - *Web Developer Internship*
JUL 2019 - DEC 2019

- **Full-Stack Development:** Responsible for developing two institutional websites and adding features to a logistics system. Utilized ReactJS for front-end and Strapi for back-end development, navigating challenges in full-stack development and gaining practical experience;
- **Client Communication and Requirements Analysis:** Engaged directly with clients to gather requirements. This direct interaction enhanced my communication skills, providing valuable insights into aligning technical solutions with client needs;
- **UI/UX Design Initiative and Knowledge Sharing:** Acquired foundational knowledge in UI/UX design to meet specific client needs, learning and applying design principles to create website interfaces. Shared insights and experiences through a presentation to other interns, contributing to shared learning experiences.

Key Technologies: JavaScript, ReactJs, Material-UI, Strapi

EDUCATION

Universidade Federal de Juiz de Fora, Information Systems - *Bachelor*
JUN 2016 - FEB 2022

As a student who had not yet discovered her vocation, in my time at UFJF I took full advantage of what the campus allowed me to do, participating in various extracurricular activities. I participated and helped in the organization of events, I used elective classes to explore areas within IT and I tried to extract the best possible from that period.

Key Technologies: HTML, CSS, JavaScript, Java, C++, Python, Prolog, Android Studio
